

Covid Safety (Fall 2021; UMN GIS Classes)

Both instructors are vaccinated and we'll be strictly enforcing mask rules. **Dual layer or equivalent masks covering nose and mouth are required at all times in class, no exceptions.** We will bring spare masks to class for you to use if you arrive without one.

In the event one of the instructors becomes exposed to an active Covid-19 case, or one occurs in any of the classes we teach, we will quarantine and move the course completely online for a period of 14 days from the date of exposure.

Given that the University has not set up a robust contact tracing system, we will rely on what contact tracing exists, and your good faith self-reporting to us if you contract covid or become aware of significant contact with someone who has contracted covid. All identities and correspondence with us will be kept strictly confidential, we will simply use this information to reduce risks for participants in all our courses
