

Lab 6

Copy from L:\FNRM3131 or \FNRM5131\LAB6
To your H:\

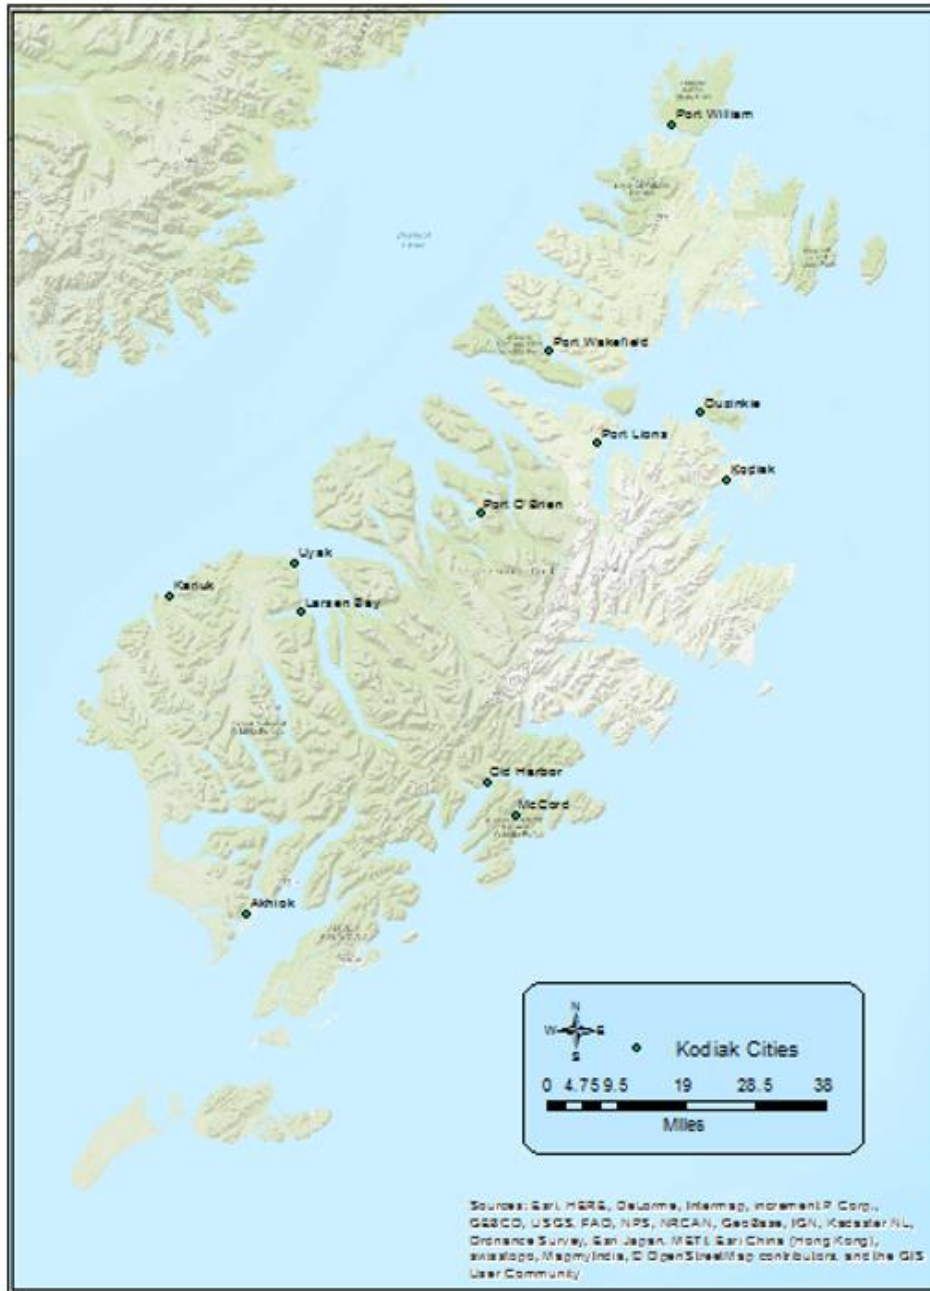

This lab has 5 different parts. It is best to treat each one as a separate NEW Map and have an associated Layout. Be organized and Save your Project as you make changes to your Maps and Layouts.

Here are my Maps and Layouts

Kodiak Island Cities

Map 1

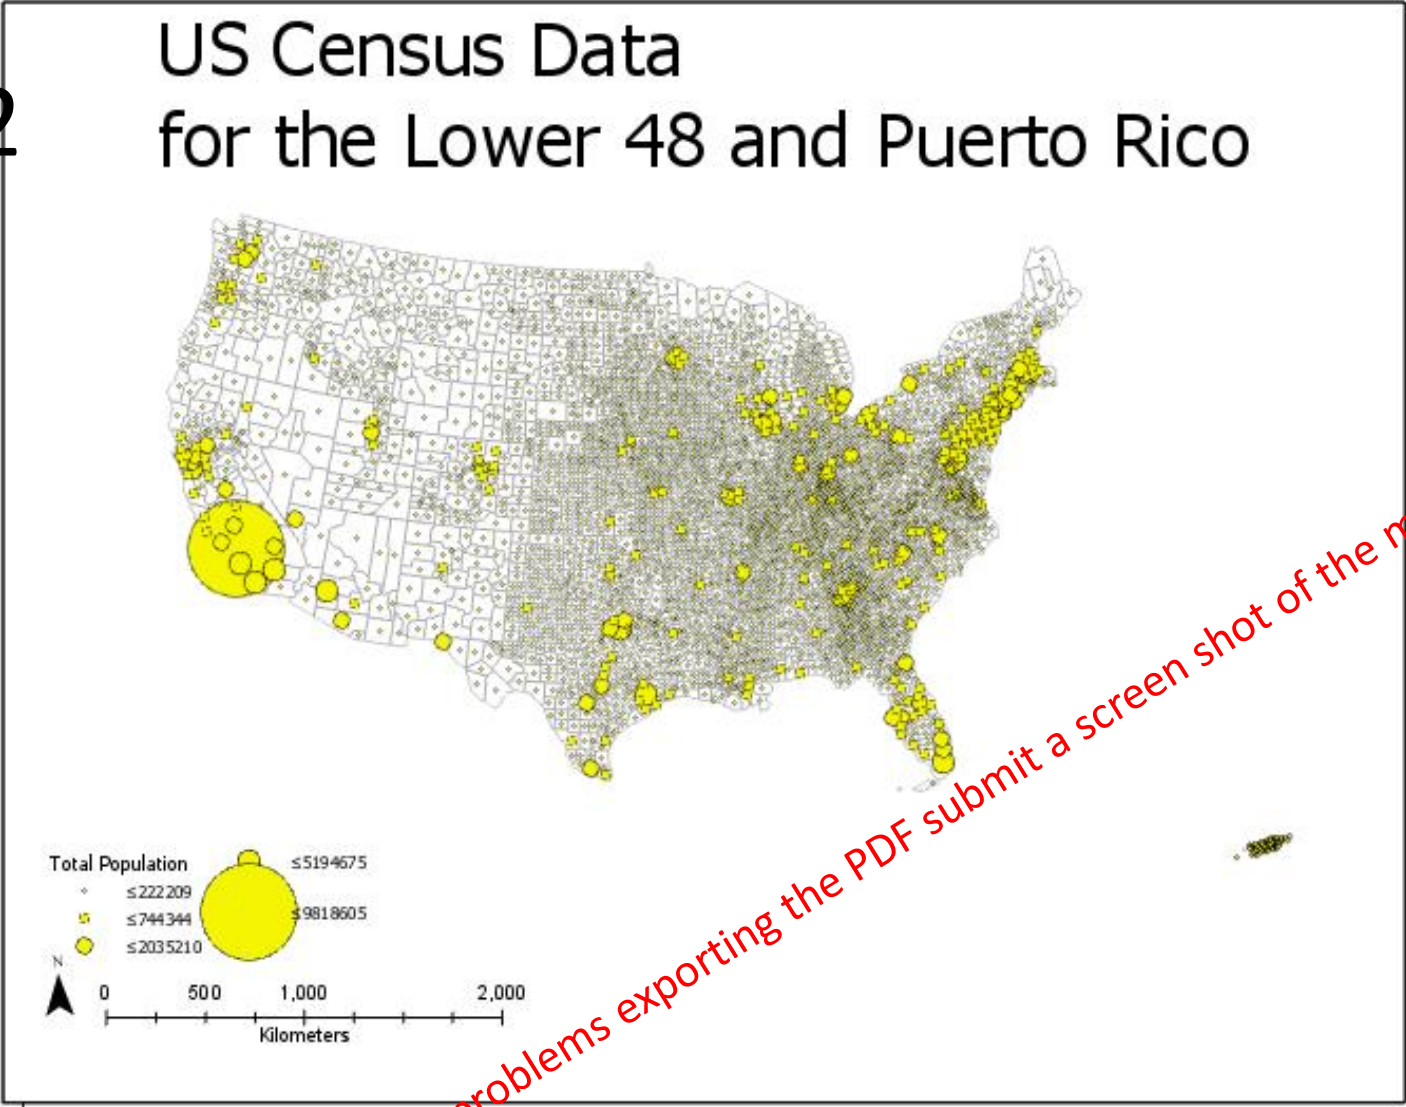

Create this map by downloading USGS data about Alaskan cities, selecting only those on Kodiak Island.

Use citiesx010g.shp if trouble downloading and unzipping

Using the Census Data may be very slow due to the large file size; be patient.

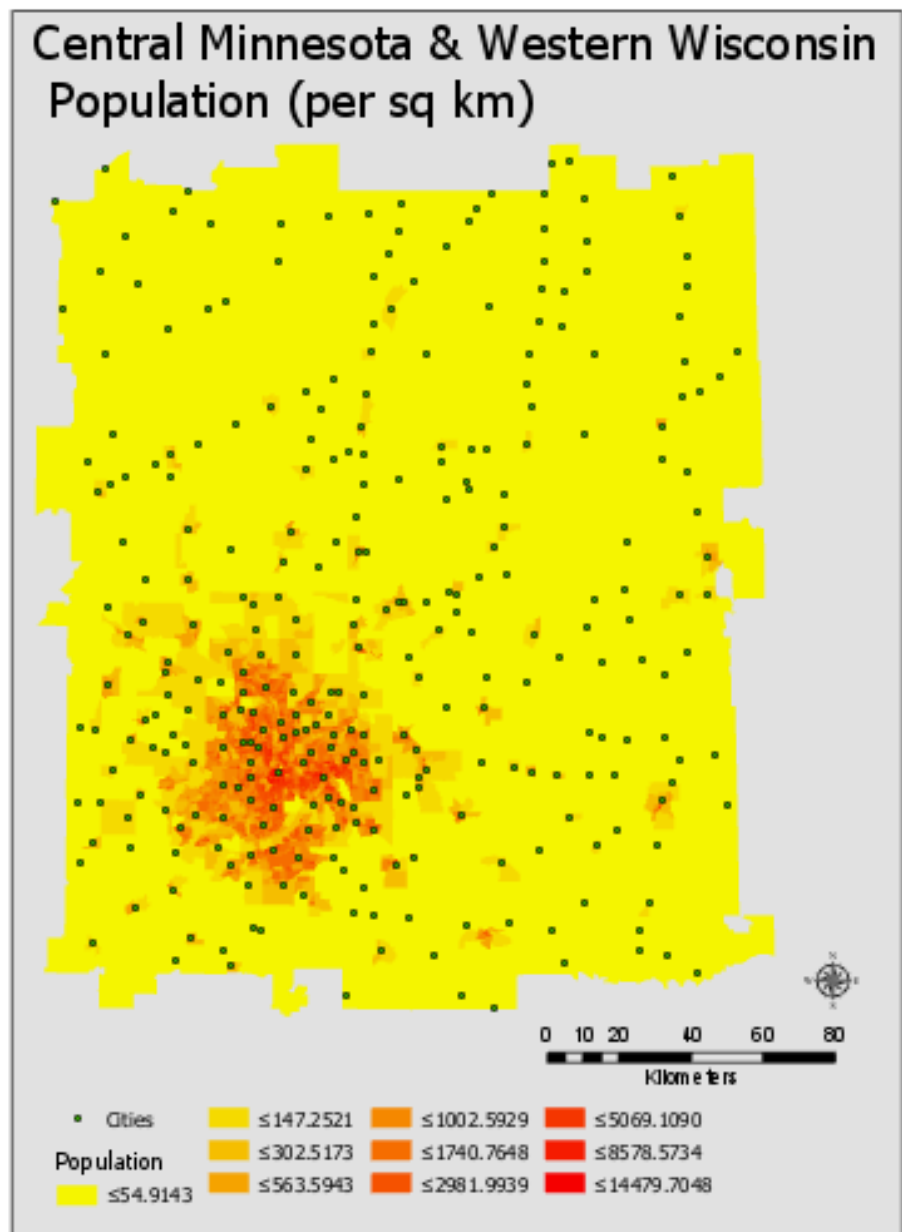

Map 2

US Census Data for the Lower 48 and Puerto Rico

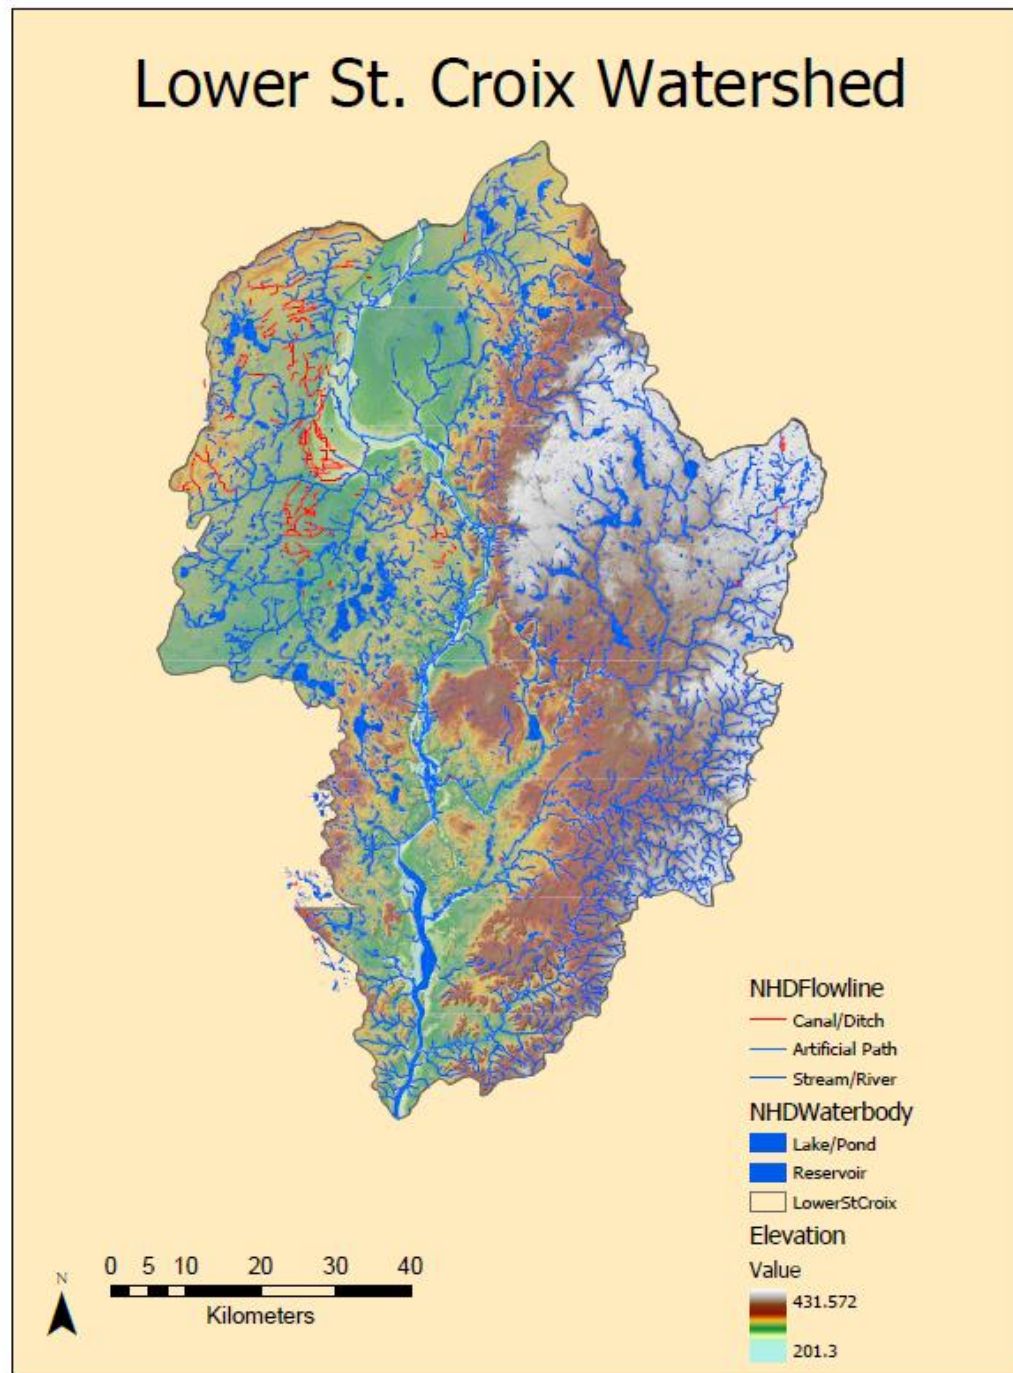

If you have problems exporting the PDF submit a screen shot of the map.

Map 3

Map 4

Map 5

Using the area field, reclassify the NWI layer by size
